Ringkasan

I am a student at SMK Negeri 1 Jenangan Ponorogo with a strong interest in Web Development and Information Technology. I am currently undertaking an internship as a Full Stack Web Developer, where I am gaining hands-on experience in developing web applications and working in a professional environment. Throughout my studies and internship, I have developed practical skills in building web-based applications using PHP Frameworks, MySQL, JavaScript, HTML, CSS, and Bootstrap. I also have a solid understanding of programming concepts and software architecture, including Object-Oriented Programming (OOP), Model-View-Controller (MVC), and Model-View-ViewModel (MVVM). I am a disciplined, fast learner who enjoys working both independently and as part of a team. I am always eager to learn new technologies, improve my problem-solving skills, and take on new challenges. My goal is to continuously enhance my expertise in web development and contribute to building efficient, high-quality, and user-friendly applications.
